The first Ship to Ship bunkering of LNG in Malmö

The first Ship to Ship (STS) bunkering of Liquefied Natural Gas (LNG) at our terminal in Malmö took place early Tuesday morning.

It was Gasums bunkering ship Coralius who filled up UECC's Auto Energy with LNG. LNG is considered to be the most environmentally friendly fossil fuel and we're happy to be able to offer our customers such a convenient operation as STS bunkering together with Gasum.
