Hurtigruten opens a new route from Copenhagen to North Cape and Tromsø

Hurtigruten is launching a new sailing from Copenhagen to Tromsø via North Cape as one of three new routes along Norway's coast. The new itinerary gives Scandinavians and international travelers the opportunity to journey from the continent to the Arctic, with stops in some of Norway's most iconic coastal towns and natural areas.

Demand from Scandinavia is growing strongly. The number of Danish customers has increased by 17 percent from 2024 to 2025, while the number

of Swedish travelers has grown by 20 percent during the same period.

“We are pleased that many Danes wish to experience Norway’s beautiful coastline, and we look forward to welcoming even more guests. With departures from Copenhagen, travelers will experience the very best of Norwegian fjords and coastal communities at a slower pace,” says Hurtigruten’s CEO, Hedda Felin.

Copenhagen Malmö Port AB also welcomes the expansion of the route offering.

“Hurtigruten’s strong heritage and focus on authentic experiences are a great match for Copenhagen as a leading cruise destination in the region. An expansion of activities into the winter months is particularly valuable, as it generates important economic activity for the city during the low season,” says Luis de Carvalho, Commercial Cruise Director at Copenhagen Malmö Port AB.

In addition to the Copenhagen route, Hurtigruten is launching a week-long fjord sailing from Bergen as well as a round trip in Northern Norway starting and ending in Tromsø. The sailings are aimed at travelers seeking authentic experiences, with longer stays in each port and excursions developed in collaboration with local operators.

All voyages will take place aboard M/S Trollfjord and follow Hurtigruten’s signature concept, where all food and beverages are included and based on local ingredients, with ample time spent in each port.

The new routes are currently being introduced with selected departures during limited periods. Bookings open on February 12, 2026, and the first sailings will take place from 2027.
